DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1-22 and 48-59, drawn to a flow through device, classified in class 210, subclass 232.
- II. Claims 23-47 and 60-64, drawn to a system combination, classified in class 210, subclass 435.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 1 includes the "tongue and groove" feature; Claim 19 includes the

“diametrically opposite” limitation, and claim 49 includes the “impermeable barrier” limitation. The subcombination has separate utility such as the removal of contaminants from a gas stream.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Once applicant elects either combination or subcombination as set forth above a further conditional species election is required.

If applicant elects the combination claims (Group II) then the following species election is also required:

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Fig. 1-2
- b. Fig. 1A-2A
- c. Fig. 11

- d. Fig. 12
- e. Fig. 13-14
- f. Fig. 15-16

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 24, 30, 44, 46-47, and 60-62 are generic.

If applicant elects the subcombination claims (Group I) then the following species election is required:

6. This application contains claims directed to the following patentably distinct species of the claimed invention:

- a. Fig. 27-31
- b. Fig. 37-39
- c. Fig. 40-42
- d. Fig 43-45

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted

if no generic claim is finally held to be allowable. Currently, 1-23 and 48 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the

evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
